Ask a question from your PDFs:

key points in ML

Answer: The key points in ML are: - Neural Networks: Algorithms modeled after the human brain - Supervised Learning: Trained on labeled data - General AI: Performs any intellectual task that a human can do - Reinforcement Learning: Learns by trial and error using rewards and punishments - Decision

Trees: Algorithms that learn from data - Support Vector Machines: Subset of ML using neural networks -
Spam detection in emails - Recommendation systems: - Predictive maintenance:
